JEEL BAROT

IT Student | Web & Mobile App Developer

- **Location** : Gujarat, India(Open to relocate to Canada)
- **G-mail** : barotjeel35@gmail.com
- **Phone** : +91 7862066043
- **LinkedIn Profile** : https://www.linkedin.com/in/jeelbarot/
- **My Portfolio Website** : https://jeel00138.github.io/Jeel-Barot/
- **GitHub**: https://github.com/Jeel00138

PROFESSIONAL SUMMARY

Versatile Software Developer with experience in web development, mobile application development, and machine learning. Skilled in building responsive web applications, cross-platform mobile apps, and backend systems using modern technologies. Strong understanding of software development lifecycle, REST APIs, and database management.

TECHNICAL SKILLS

Languages :
C, C++, JavaScript, Python, Java, PHP, Dart,

Web Technologies :
HTML, CSS, Responsive Design

Mobile Development:
Flutter , Kotlin

Databases:
MySQL, Oracle , SQLite

Tools & Technologies:
Git, GitHub, REST APIs, Android Studio, VS Code,Cygwin64,VS2022,Apache NetBeans , Anaconda3 , Jupyter Notbook , Spyder , WordPress , Canva , Corledraw , .NET , Selenium Testing , PlayWrite

Core Concepts:
OOP, Data Structures, Debugging, Software Testing

EXPERIENCE

Mobile App Developer Intern (Flutter)

Appifly Infotech Pvt. Ltd. | Remote

- Developed cross-platform mobile applications using Dart Language in Flutter
- Integrated REST APIs and improved UI performance Using Android Studio
- Collaborated using Git version control

Machine Learning Intern

CodSoft | Remote

- Built ML models using Python and Scikit-learn in Spyder
- Performed data preprocessing and analysis using all python libraries

---

PROJECTS

➢ **Web Applications (PHP, JavaScript, MySQL)**

1) Coffee Shop Website

2) Emergency Ambulance Booking App

- Built a real-time ambulance booking platform with request and tracking functionality
- Implemented user registration, booking system, and backend integration
- GitHub: https://github.com/Jeel00138/Emergency-Online--Ambulance-Booking/tree/4d52935a69bcc7042bd59f430a332aaf51d663f2/EAHP-Project-PHP

3) **Car Rental Management System**

- Developing a system to manage vehicle bookings and rental operations
- Implementing car availability tracking and billing system
- GitHub: (add when ready)

➢ **Mobile Applications (Flutter)**

1) Gpay Clone

- Developed a digital payment interface with modern UI/UX design
- Simulated transaction workflows and optimized app performance
- GitHub: https://github.com/Jeel00138/Flutter-Projects/tree/18f6597d236694339392ed145f70d43b27394bad/Gpay_app/Gpay_app

2) Music App

- Created a music streaming app with playback and UI features

- Focused on performance and smooth user experience
- GitHub: https://github.com/Jeel00138/Flutter-Projects/tree/18f6597d236694339392ed145f70d43b27394bad/music_app/music_app

➢ **Machine Learning Projects (Python)**

1) All 5 ML Tasks

- Performed data preprocessing, feature selection, and model training
- Implemented algorithms like Linear Regression, Logistic Regression, and Decision Trees
- Evaluated model performance using accuracy, precision, and confusion matrix
- GitHub: https://github.com/Jeel00138/CODSOFT

EDUCATION

Bachelor of Computer Applications (BCA)
Charotar University of Science and Technology | 2023 – 2026
GPA : 9.81

CERTIFICATIONS

- **IoT Devices Course** - University of Illinois Urbana-Champaign
- **Preparation for Job Interviews Course –** Coursera Project Network
- **Oracle Java Foundations Course -** authorized by Oracle
- **Python 101: Develop Your First Python Program -** authorized by Coursera Project Network
- **Introduction to Cyber security Essentials -** authorized by IBM
- **Technical Support Fundamentals -** authorized by Google

LANGUAGES

English • Hindi • Gujarati
